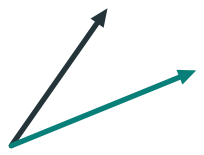
01

Bring them together.

They match.

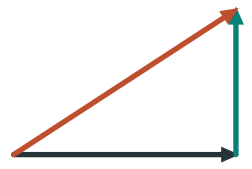


Now there is a difference.

02

Take this step.

Then take this step.



One step reaches the same end.

03

A few steps.

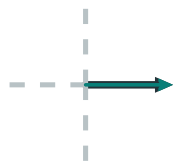
More, smaller steps.

Follow the change more closely.

04

Start together.

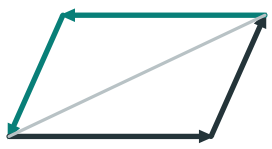
Turn just one.



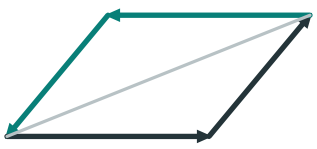
A full turn brings it back.

05

Two pieces make this patch.

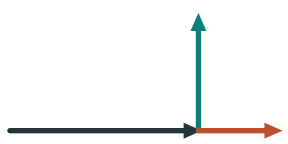


Slide the top sideways.



Same area. Different shape.

06

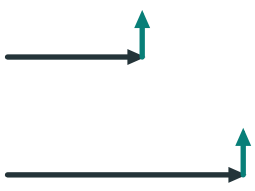


Green sets black’s next change.

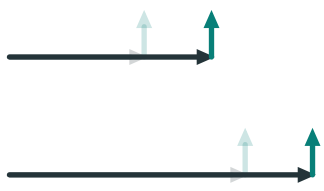
Black sets green’s opposite change.

Together, the pair turns.

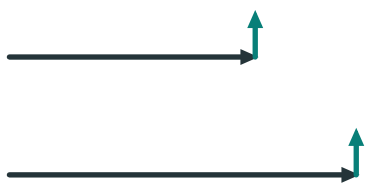
07



New rule: slide at green’s pace.



Start farther along.



The same shift survives the move.

08

Black advances.

Green stays the same.

Every step keeps that amount.
